

TEST CASE SPECIFICATION

By Team 1

WHAT IS TEST CASE SPECIFICATION?

Test case specification is the documentation detailing how a certain part of the software is to be tested. It describes the goals and scope of a test case, what is to be provided as input, the conditions under which the test case is to be conducted, and the expected results.

COMPONENTS OF A TEST SPECIFICATION

- Test Case ID
- Title
- Objective
- Prerequisites
- Test Steps
- Test Data
- Expected Results
- Actual Results:
- Pass/Fail Criteria
- Comments

COMPONENTS OF A TEST SPECIFICATION

Fields	Components	Details
Test Case ID	A reference tag for the test case.	TC002
Title:	A short name of the test case that briefly describes it.	Password Reset Functionality
Objective:	What is being tested and why, the purpose of the test case.	Verify that users can reset their password using the 'Forgot Password' feature.
Prerequisites:	Any prerequisite that is needed before running the test case, including data precondition or environment precondition.	• User account with a registered email. • Access to the email account for verification.

COMPONENTS OF A TEST SPECIFICATION

Fields	Components	Details
Test Steps:	A description of the actions that are to be performed in order to execute the test case in a very detailed and in a step by step manner.	1. Navigate to the login page. 2. Click on "Forgot Password" link. 3. Enter the registered email address. 4. Click "Submit." 5. Check the email inbox for reset link. 6. Click the link and enter a new password. 7. Confirm the new password and submit.
Test Data:	The test input data that are necessary for the test, the specific values and conditions to be used.	• Email: testuser@example.com • New Password: NewPassword123!

COMPONENTS OF A TEST SPECIFICATION

Fields	Components	Details
Expected Results:	The possible results of the test such as certain outputs or alterations of the system.	The user receives a password reset email, follows the link, enters a new password, and receives confirmation that the password has been successfully changed.
Actual Results:	The results obtained in the course of testing and which are used to define whether the test case is successful or not.	[Leave blank for test execution]
Pass/Fail Criteria:	The criteria used in the evaluation of the test case in relation to the comparison of the expected and actual outcomes.	The password reset email is received within 5 minutes. - The reset link works correctly and leads to the reset page.- The user can log in with the new password without any issues.
Comments	Any other comments that can be made about the test case, for example, problems faced during the test case or recommendations for future test cases.	Ensure that the email template contains the correct information and branding.

The image features a minimalist design with the words "THANK YOU" centered in a bold, dark grey, sans-serif font. The background is a light grey. In the top-left and bottom-left corners, there are decorative elements consisting of numerous thin, dark grey lines that curve and overlap, creating a sense of movement and depth.

THANK YOU
